

DAISY JANIE | blue snowflake pillow box

DIRECTIONS

- * read through all directions first :) * cardstock works best * outer lines are cutting guides * inner lines are folding lines
- + print design + cutout pillow box shape + score inner curve lines (see tip below) + fold/crease inner horizontal lines + carefully pinch/crease scored curves toward inside of box + glue or use double-sided tape to affix tab to other side of box (patterned side goes on the inside) + fold curved sides inward + wrap with pretty ribbon + tag
- scoring tip: place mousepad under cardstock & use the backside of a kitchen knife to make a strong score - but don't cut! experiment with pressure on another sheet of cardstock to get a feel for it. take your time - this is what makes/breaks the whole thing.
